

Sound Teeth Guarantee

As easy as 1, 2, 3...

Process Flow

The Assessment Process

The structural soundness of patients natural teeth can be assessed as part of a standard routine dental check-up or diagnostic examination. A full set of bite-wing or a panoramic x-ray is required for each patient assessed for a guarantee.

Rendering a Professional Opinion

The assessing dentist scans the x-rays with the advanced ai system and renders a professional opinion with respect to the soundness of the assessed patient's natural teeth.

Issuance of the Guarantee

The assessing dentist recommends a guarantee to all assessed patients whose teeth are determined to be in a structurally sound and cavity free state. *(problem teeth can be either temporarily ring-fenced or excluded).*
